Chief, Production Assessment and
Improvement Division

SUBJECT: Rationale for DIA's Need for Supergrades
and Civil Service Commission Regulation
Exemption

1. At the conclusion of our briefing to Admiral Murphy on the findings of our DIA study, he indicated that he would like us, as part of our DIA study, to examine DIA's need for civilian supergrade positions and exemption from at least some of the constraining Civil Service Commission's (CSC) regulations. The requested paper is attached.

2. In light of the OMB-directed task for the ICS to survey and rationalize supergrade positions throughout the Community, we have deliberately based our comments as much as possible directly on the findings of our DIA study. We don't believe that the attached paper on DIA's needs preempts the potential findings of any future study of the Community supergrade structure.

3. DIA has informally validated the data on DIA supergrades.

4. The paper has been prepared to serve as an annex to our final report to DIA or to stand on its own, if desired. Since there is much activity within DIA and OASD(I)/DDI right now addressing the supergrade

problem and the need for CSC exemption, we feel that a copy of the annex should be forwarded separately to DIA as soon as possible, as well as being included in the final report.

5. Recommend that you forward the attached to Admiral Murphy for signature. STATINTL
